RALLY AND MARCH DÉPARTURE

CITIES TO VILLAGES FOR THE RIGHT TO HOUSING

From September 2 to 29, 2018, the FRAPRU will undertake a march from Ottawa to Québec City to defend the right to housing. More than 500 kms will be covered.

305 590 households in Québec have a pressing need for housing. This goes to say that they live in a unit that is beyond their means, too small for their family, and/or in a bad housing condition. They are confined to living in a place where they do not feel secure or that is not adapted to their physical capacity.

In order to respond to the pressing urgent need in a sustainable manner, it demands social housing now ! **FRAPRU estimates that it will take 50 000 new social housing units in 5 years.**

But the governments continue to drag their feet. The federal and Quebec investments will only finance 3 000 new social housing units per year for all Québec, it takes an eternity to construct these, because the government subsidies are insufficient. In the last 5 years, only 9 953 social housing were delivered. However, it is not due to lack of money. Increasing the respect to the right to housing is a question of choice.

The FRAPRU march for the right to housing targets:

- Make visible the problems of those in bad housing conditions;
- Strengthen solidarity;
- Put pressure on the governments in Ottawa & Québec to invest much more in social housing.
