# Federal government must fund social housing!

**Gathering for social housing in front of National Housing Conference in Ottawa on March 18**

The housing crisis is relentless and the need for social housing has rarely been greater. **The federal government's contribution could make a difference.** This is all the more true given that the federal government's withdrawal from social housing funding in 1994 deprived Quebec of 80,000 social housing units.

While the National Housing Strategy is supposed to prioritize support for the most vulnerable, the billions of dollars spent to date have been used mainly to build apartments that are too expensive for low- and moderate-income families and individuals. The little money that can be used for social housing takes years to arrive, and projects have to find other sources of funding to get off the ground.

Ottawa must finally turn things around. It has the means to finance thousands of social housing units a year. To do this, **ALL THE FUNDS IN ITS STRATEGY MUST BE EARMARKED FOR SOCIAL HOUSING (HLM, cooperatives and NPOs), STARTING WITH ITS NEXT BUDGET.**

FRAPRU is organizing a gathering in front of The Westin Hotel, where the conference is being held, to remind the federal government that the solutions are already known, all we have to do is put the money in the right place: social housing!

**JOIN US ON MARCH 18, from noon to 1:00 p.m., in front of The Westin Hotel.**
